No self quarantine required for fully vaccinated people travelling from very high-risk areas

The self quarantine rules for people travelling to the Netherlands are changing from 22 September.

Fully vaccinated people travelling from very high-risk areas no longer have to quarantine on arrival.

Prepare your journey well. Before you leave, check the travel advice here and do the check on reizentijdenscorona.nl/en.

You are fully vaccinated:

- It has been 14 days since you got your second dose of the BioNTech/Pfizer, Moderna or AstraZeneca vaccine, or 28 days since you got the single-dose Janssen (Johnson & Johnson) vaccine, or 14 days since you got 1 dose of vaccine and you also have proof of recovery.
- Or the vaccine you received must have been approved by the European Medicines Agency (EMA) or on the Emergency Use Listing of the World Health Organization (WHO).

You are not fully vaccinated:

- The EU entry ban applies to you.
- You are required to self-quarantine.
- You must have a quarantine declaration.
- You must have a negative test result.

The electronic quarantine declaration form is available at:
- quarantinedeclaration.government.nl

Find out who is exempt from the negative test result requirement at:
- Negative COVID-19 test result exemptions

Find out who is exempt from the EU entry ban at:
- List of EU entry ban exemptions

Find out who is exempt from mandatory self-quarantining at:
- Self-quarantine requirement exemptions
