Date

6 February 2020

Pursuant to Article 19 of the Commission Decision of 6 October 2009 on the definition of the European Electronic Toll Service and its technical elements, Member States must keep an up-to date national electronic register. In this register the Member States set down the EETS domains in their territory, and to which EETS providers they have granted registration.

The Ministry of Infrastructure & the Environment reports that as of 6 February 2020:

EETS-domains

There are no EETS domains in the Netherlands.

EETS-providers

The following EETS provider is registered in the Netherlands:

Multi Service Tolls

Volmerlaan 5
2288 GC Rijswijk

The information set down in this register can be changed in the future. Furthermore, the Dutch state cannot be held liable for the actions of (future) EETS providers listed in this register.

EETS is based on:

- Directive 2004/52 of the European Parliament and of the Council of 29 April 2004 on the interoperability of electronic road toll systems in the Community;
- Commission Decision of 6 October 2009 on the definition of the European Electronic Toll Service and its technical elements.
